Evan Gilligan is a history of both evolutionary theory and ideas about race and racism. In an intellectually engaging narrative that mixes science, history, theories and personal experiences, the author explains the continuing controversy over the heritability of intelligence, criminal behavior, and disease. The author also discusses the role of eugenics in American society, and explores the ways in which people use science to build better lives. Ancient philosophy has inspired modern research in aeronautics and rocketry. Also, his wife became one of the century's leading feminist voices. This book is an invitation to a dream school with a rowdy faculty that includes twelve of the greatest thinkers and scientists of the 20th century.
