Handbook of Child and Adolescent Aggression

Nicki H. Harnish 2004-11-01 In this volume, experts provide a comprehensive perspective on how and why children and adolescents become aggressive. The authors present research findings from psychology, psychiatry, medicine, and education that contribute to a more nuanced understanding of the development of aggression, its causes, and its consequences. The volume examines why children and adolescents feel the need to act aggressively, what维护s them to act, and what it means to become a successful adult. It also explores how aggression affects everyone in the child's social world, including family members, teachers, and classmates, and it discusses the myriad of societal implications of aggression.

The Handbook of Parenting and the Family: Wang, S. Patterson 2005-12-01 This handbook provides an up-to-date summary of current knowledge about family processes and family interventions, especially in terms of helping families to manage stress, promote positive outcomes, and prevent problems. The Handbook offers an interdisciplinary perspective that integrates both psychosocial and biological factors, and it provides research-based evidence for the efficacy of family interventions. The Handbook is divided into six sections: Introduction and overview of family processes, Biological factors in family processes, Psychosocial factors in family processes, Family interventions, Social support and its relation to family processes, and Future directions for the field. Each chapter is written by an expert in the field, and it covers a wide range of topics, including family communication, family decision-making, family relationships, family stress, and family interventions.
